

Lab Goal : The lab was designed to teach you how to use &&, ||, and !.

Lab Description : Compare three Strings to see which is the biggest. When comparing the strings, use compareTo() to determine which one has the greatest alphabetical value.

Sample Data :

```
"abc" "cba" "bca"  
"one" "fourteen" "twenty"  
"124323" "20009" "3434"  
"abcde" "ABCDE" "1234234324"
```

Files Needed ::

```
BiggestString.java  
Lab12b.java
```

Sample Output :

```
abc cba bca  
biggest = cba  
  
one fourteen twenty  
biggest = twenty  
  
124323 20009 3434  
biggest = 3434  
  
abcde ABCDE 1234234324  
biggest = abcde
```
